# TANGRAM

É um quebra-cabeça chinês, de origem milenar. Existem várias lendas sobre sua origem.

Consiste na formação de figuras e desenhos por meio de 7 peças (5 triângulos, 1 quadrado e 1 paralelogramo).

Uma das lendas conta que um Imperador chinês quebrou um espelho, e ao tentar juntar os pedaços e remontá-lo, percebeu que poderia construir muitas formas com seus cacos.

Durante o jogo, todas as peças devem ser utilizadas; além disso, não é permitido sobrepor nenhuma peça. O **Tangram** pode ser utilizado em aulas de matemática, uma vez que o mesmo estimula os alunos a desenvolverem a criatividade e o raciocínio lógico, habilidades essenciais no estudo da disciplina.

## **ZANÚBIA DADA**

Profissional Surda, residente em Campo Grande – MS  
Professora de Matemática, qualificada para ministrar  
aulas em Libras para estudantes surdos.  
Pós Graduada em Educação Especial.
